Gemba Academy Learning Paths

The purpose of the learning path is to improve the organization through the development of people. All continuous improvement activity should be engaged with the spirit of solving problems and making improvements, rather than meeting a training requirement.

This is an example of a learning path for associate through leader levels of an organization. This path is intended to be progressive. All members of an organization, regardless of position, would complete the Lean Associate path. Team leaders, supervisors, knowledge workers, and continuous improvement specialists would move on to the Lean Champion path. Managers and senior leaders would continue on to complete the Lean Leader path.

This path is a starting point for Lean learning. All members of the organization are encouraged to continue down the path beyond their current position.

This is what a Lean learning progression might look like.

| Begin Daily Lean Practices | Establish daily continuous improvement practices by applying 5S in your workplace. | 5S Workplace Productivity  
Gemba Academy Live at FastCap 2012  
5S Action Guide  
SSF Cross-Training Board | • Understand what problem you are trying to solve with 5S  
• Keep improvements small at first—go for quick wins  
• 5S three small areas individually or as a team  
  • Train the team to new 5S standards in these areas  
  • Follow up to sustain improvements  
• Use the Action Guide to report out to team and management what problem was addressed and how your countermeasures are helping  
• Implement a skills matrix to support the development of people  
• Celebrate improvements |
| Find and Eliminate Waste | Understand all forms of waste, recognize them in your processes, and implement a system for eliminating them | Dealing with the 7 Deadly Wastes  
7 Deadly Wastes Action Guide  
Gemba Academy Live at FastCap 2014  
Stand in circle exercise | • Complete the Stand In the Circle exercise to identify wastes  
• Keep it simple  
• Make improvements based on observations  
• Use your wits over your wallet—avoid spending money  
• Develop and implement a simple system for the team to manage improvements (this could be a simple list on a white board or kaizen newspaper)  
• Fix what bugs you  
• Celebrate improvements  
• Make this a daily practice |
| Standardize Your Work    | Create or improve standards for your work                             | Standard Work                                                             | • There can be no sustained improvement until there is a standard  
• Create or improve three documented standards for work done in your area of responsibility  
  • Don’t forget about standardizing your team's continuous improvement practices  
• Train your team to the new standard  
• Celebrate improvements |
| The Kaizen Event         | Make larger scale improvements by work as part of a kaizen event team using the kaizen event model | Kaizen Way  
Kaizen Way Action Guide | • Keep it simple  
• Understand the problem you are trying to solve  
• Be sure the kaizen event model is the appropriate approach  
• Participate in three kaizen events as a team member  
• Celebrate improvements |

| Problem Solving     | Make A3 Thinking an integral part of your organization’s culture to improve problem solving, foster mentor ship, and foster collaboration | A3 Thinking  
Mike Osterling on A3 Thinking  
So You Think You Need an A3 Template  
Practical Problem Solving | • Be or have a mentor along every step of the A3 process  
• Collaborate with team at every step (team approach)  
• Create a lasting improvement  
• Report out to share improvements  
• Use a defined problem solving method to build problem solving skills and solve problems |
| Built In Quality    | Don’t accept, make or pass on poor quality. Stop defects (mistakes) at the source. Develop processes to stop and fix problems when they arise. This applies to non-manufacturing and manufacturing processes alike. | 8 Dimensions of Quality  
Own-Process Completion as the Basis of Lean Quality  
Built In Quality | • The problems are with the processes, not the people  
• Start small and devise methods to implement in one process at a time  
• Take it one small step at a time  
• This is a change of mindset—teach, coach, mentor and inspire people to make the change  
• Be persistent  
• Be ready to deploy all available resources as needed to address defects when are where they are made |
| Kaizen Events       | Become a kaizen event leader                                         | Kaizen Way  
Kaizen Leadership                                                               | • Lead three kaizen events (can be part of A3 problem solving listed above)  
• Develop others while developing your own leadership skills                   |

| **Visual Management**      | Improve processes by creating or improving visual management                               | *Visual Management at Fireblast*  
  *Visual Queues and Color Codes*  
  *SSF Visual Factory - Production*  
  *SSF Visual Factory - Process Development*  
  *What Good Looks Like Accountability Through Visual Management*  
  *Visual Management in the Pharmacy - Franciscan Health* | • Create or improve three visual management tools to improve processes  
 • Train the team on the new standard  
 • Follow up to make sure the new standard is maintained  
 • Can be included with A3 Thinking and Kaizen Events listed above |
| **Value Stream Mapping**   | Use value stream mapping to thoroughly understand the current state, future state and opportunities to bridge the gap | *Value Stream Mapping Overview*  
  *Value Stream Mapping: From Tool to Management Practice*  
  *Transforming Your Value Streams*  
  *Value Stream Mapping Confusion* | • Create a current state value stream map for a single value stream  
 • Create a future state value stream map for the same value stream  
 • Collaborate with leadership and teams to develop and implement a continuous improvement strategy |
